

When DevOps Cat and Chaos Collide

by Yoko Li

This happened at 3AM

It's an all paws on deck type of situation. Luckily my human already had her runbook set up — so I can just run it?

Yoko H Li

Runbook says I should run this script by copying this command on the command line...

Again, the cat in the story saves the day

Yoko H Li

ERROR: Cannot scale web service.
Service name not found

Yoko H Li

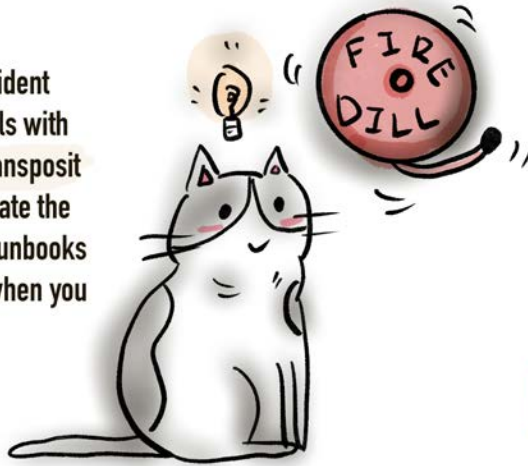

When was the last time the runbook was tested?

↑ No one knows

Well, Gremlin + Transposit can help
(No, I'm not baby Yoda)

If you run more incident management fire drills with Gremlin using your Transposit runbooks, and automate the relevant pieces, your runbooks would be up-to-date when you need them!

Yoko H Li

Next time when an alert goes off, it wouldn't be so bad

Transposit_runbook.md

Tested & validated with Gremlin on 9/30/2020

Fetch Metrics

Service Problem

Scale Service

Yoko H Li

So when an alert goes off at 3AM again...

Yoko H Li

It's hard being oncall for my human — be kind to those who need to be oncall!

Yoko H Li

#AutomateSmarter

About Transposit

Transposit's Mission Control incident command center keeps track of everything that happens during an incident, while streamlining communication, augmenting your team, and accelerating actions between systems with the context you need. We uplift your stack with the power of interactive automation, integration, and infinite extensibility.

Transposit: Evolve freely. Collaborate simply. Resolve rapidly.
